Ill. State Officers Pay Official Visit To O.E.S. Chapter

**Agnes MacMeekin, Grand
Matron, Staff, Welcomed
to Dinner, Meeting**

Honoring Mrs. Agnes T. MacMeekin of Chicago, worthy grand matron of the Illinois grand chapter, Order of Eastern Star, and other state officers on the occasion of Mrs. MacMeekin's official visit to the Antioch chapter was a 6:30 o'clock dinner in the dining room of the Antioch Methodist church last Thursday evening.

Decorations were in the Eastern Star colors, red, blue, green, yellow and white, with a centerpiece of cut-out stars on the grand officers' table. Place cards featured dark red artificial roses in honor of the grand matron, who has chosen the rose as her official flower. A miniature American flag was placed on each table, in a holder made of crepe paper in the "star" colors.

After the dinner, at which 70 were served, the gathering adjourned to the Masonic temple, where a meeting was held at 8 o'clock with many out-of-town chapters represented among the 125 persons attending.

Members of Mrs. MacMeekin's staff who accompanied her here included Mrs. Ann Roop of Fox River Grove, grand Ruth; Mrs. Marjorie McIlraith, Chicago, grand chaplain; Mrs. Helen Schiasschug, Chicago, Grand sentinel.

Past Officers Attend
Mrs. Emma Hanson, past grand matron, present from Fox Lake, and Arthur Johnson, past grand patron, from Rockford, were also welcomed to the East by Mrs. Margaret Gaston, worthy matron of Antioch chapter.

Committees for the dinner included Mrs. Helen Chapman, arrangements chairman; Mrs. E. J. Ilay, Mrs. Deborah Van Patten, decorations. The dinner was prepared and served by women of the Methodist church, with Mrs. Clara Westlake as chairman.

Ancient "Landmark Tree" at Lake Villa Cut Down

Old-age and hollowiness that finally made it a source of danger in the event of a windstorm resulted in the passing of an ancient "landmark tree" that stood in front of the Al B. Maier place at Cedar lake, Lake Villa, until yesterday.

The tree, an elm, 20 feet in circumference and about 100 feet high, had been marked by either Indian tribes or prehistoric residents of the area, apparently to show where two trails converged.

About 30 years ago, botany classes from the University of Chicago used to make an annual pilgrimage to visit the tree, which was believed to be the oldest in Lake county. Its age has been variously estimated as from several hundred to nearly a thousand years.

Because of the number of Indian relics found in the area, it is believed that an Indian village or camping ground may have been located nearby, and a prehistoric Indian mound on Allendale farm a short distance away supports the theory that the site had been used since ancient times.

Any well-planned effort to reduce accidents on farms deserves the fullest publicity and popular support."

Employers Liable for Vacation Pay to Minors

Minor students who work during school vacation are in employment within the meaning of the Illinois Compensation act, according to a statement issued by State Director of Labor Francis B. Murphy. The law provides that, while the minor is actually in attendance at school, his chief occupation, generally, is that of a student, but when schools close the status of the working minor student is the same as that of any other employee.

Illinois employers are reminded that wage reports and contributions for the second quarter of 1944 are now due and must be submitted by the midnight July 31 deadline, to avoid interest of 1 per cent on unpaid contributions and penalty of 2 per cent a month or part of a month on delinquent wage reports. The contribution rate for each employer, Murphy explained, appears on the Form UC-3 sent to him by the Division of Placement and Unemployment Compensation. Employers cannot be too careful in checking forms for accurate recording of names, numbers, amounts, and signatures, he said. Checks should be made payable to the Director of Labor and mailed or sent to the Division of Placement and Unemployment Compensation, 300 Merchandise Mart, Chicago 54, Ill.

Legion Festival Proceeds Figured at Around \$3,000

**Record Crowds and Fine
Weather Greet Four-
Day Carnival**

While exact tallies are not available, it is estimated that when all expenses have been taken care of, the Antioch American Legion post will have cleared in the neighborhood of \$3,000 from the four-day annual carnival which closed Sunday evening.

The Legion auxiliary will receive one-third of the proceeds as its share for assisting in the work of the carnival, including management of many of the booths.

4,000 There Saturday
A record crowd of between 3,500 and 4,000 persons flocked to the grounds west of the village park to attend the festival Saturday evening. Parking lot attendants stated that 400 automobiles were in the lot at one time, while many persons did not even attempt to drive near the grounds, but parked their cars several blocks away.

Good attendances Sunday evening, and Thursday and Friday nights, helped to swell receipts for the Legion.

Ideal weather favored the festival throughout the four days. One small boy was "lost" for a few minutes Saturday night, and one lost purse was reported, but aside from these, and despite the thousands of persons attending, the carnival was unmarked by unpleasant incidents of any type.

Rides, games and refreshment booths, as well as special features such as dancing on an outdoor floor loaned by the Antioch Lions club, helped to provide entertainment for those attending.

Wilmot H. S. to Inaugurate Bus Transportation

**Proposed Routes for Student
Pickups, Starting in
Sept., Announced**

The board of education of Union Free High school at Wilmot has announced establishment of bus transportation for Union Free High school students starting this September.

Under the proposed plan there will be no charge for transportation to pupils living within the Union Free High school district. The cost for students living within the district will be paid by the Union Free High school board of education as was authorized by the voters at the annual high school meeting.

The bus routes will extend well beyond the boundaries of the school district, and for those students who ride on the busses and live outside the district, the charge will vary from \$1.25 to \$2.00 per week, depending upon the distance they are transported.

Two new 45-passenger busses will be in operation this year. They will meet all safety requirements of the State of Wisconsin for the transportation of children. The busses are being purchased and operated by Lester Dix, of Salem, Wis., who has entered into contract with the high school board for this purpose.

One proposed route will start at Salem and go east through Bristol township as far as Pleasant Prairie and then west on Highway 500 into Bristol village and then as far as Brass Ball Corners, from there to Salem, through the villages of Camp Lake and Trevor to Wilmot.

A second route will be north from Salem to the north side of Paddock's Lake into Brighton township, west through Brighton township and then south to Highway 50 at Mound Center corner, from there west on highway 50 to Slades Corners, then through the villages of Powers Lake, Twin Lakes and Bassetts to Wilmot. A third route will go to Silver Lake and Fox River. These routes may be changed or adjusted to meet requirements.

Bus stops will be designated and students will be picked up at such stops and delivered to such stops. Persons interested in more details may contact either members of the board of education, George Dean, Bassetts; Otto Schenning, Fox River; R. C. Shottliff, Wilmot; principal Marlin M. Schnurr, Wilmot, or Lester Dix, of Salem.

The Railroads of Tomorrow

The Association of American Railroads has released an interesting report on the railroads of tomorrow. It is based on facts, not dreams. It says in part:

"The railroad of today is, and the railroad of tomorrow will be, essentially a machine for the mass production of transportation with minimum expenditure of labor and power, and with maximum efficiency."

"... The track of the future will be made of better and tougher steel. It will have fewer joints. ... It will be safer track and ... make possible higher speeds ... it will enable a given unit of power to pull heavier trains."

"... Cars will be made of lighter-weight, high-tensile metals, not so much for the purpose of increasing the speed of trains as of decreasing dead weight ... so that a given unit of power may perform a greater amount of transportation work. These cars will have improved draft gear ... trucks ... and ... brakes to permit smoother handling. ..."

"The locomotive power of the future will be varied, depending on needs in particular situations. ... There will be a greatly accelerated use of Diesel power in road passenger and freight service, and even more in switching. There may be steam-turbine or gas-turbine locomotives; or ... there may be locomotives using the power of atomic explosion, but for a long while to come the bulk of the service will be accomplished by steam engines. In horsepower per axle, per pound of fuel, and especially in performance ability at speeds above forty miles per hour, the steam engine has shown startling development."

"... On the passenger side, the line of development will be enlargement of the air-conditioned, streamlined era which was well underway when interrupted by war. There will be new types of all-room Pullman cars so arranged that rooms may be sold at not much more than the present price of a lower berth. There will be other sleeping cars designed to sell space at prices well below the present rate. The forerunners of both types of cars are in existence now ... In general, railroad passenger service will stress spaciousness, com-

fort and smartness rather than great increases in speed. ... All in all, the railroad of tomorrow will be a projection of the railroad of today, just as today's railroad is a projection of its predecessors. The history of the railroads, especially for the last fifty years, has been one of meeting mounting wages, prices and taxes, through greater capacity, greater dependability, greater efficiency and lower unit costs. ..."

End of the Beginning

It is truly the beginning of the end for Hitler, Tojo and their gangsters. But it is just the end of the beginning for American industry, whose amazing production for war is in the valiant hands of men now inside the Germans' vaulted fortress.

Industry is rightly looking to the next big job, which begins when hostilities end. It wants to keep the production level high. It knows that jobs in manufacturing, although they provide but 25 per cent of all employment, stimulate millions of other jobs—in business, agriculture, mining.

There must be jobs which will make the spending—which in itself make more jobs. In other words, there must be incentives. These will lead to newer and better products at prices people are willing to pay, the while business improves the quality of its goods, produces them more efficiently, distributes them less expensively.

Meanwhile, where are government's plans for re-conversion to peacetime production, for sound and sane termination of contracts? And where the assurance that wartime restrictions will be lifted at the proper time? Without knowledge of government's plans, and the assurance that business should have for the future, it cannot reasonably make its own plans for the better America to come.

THE OLD JUDGE SAYS...

"I don't blame the fellows overseas for gettin' all het up over it, Judge. For the likes of me I can't see what's all the hurry about holdin' these local prohibition elections while they're away."

"I agree with you, Steve. Time after time... in their letters, in articles, in polls taken to get the views of our fighting men... they have indicated in unmistakable terms that they don't want any action taken on

prohibition, either local or national, until they get back."

"Too bad there isn't a law or somethin' to be sure their wishes are carried out, Judge."

"There is in one state I know of, Steve. Just recently it passed a law prohibiting the calling of any prohibition election until a year after the peace is declared."

"That really makes sense to me, Judge."

What causes washing machines to break down?

Answer...

Recent surveys reveal that overloading causes more washing machine breakdowns than any other reason!

It's easy to avert a breakdown due to overloading:

Do not fill the tub of your washer beyond capacity. It is important that in order not to overload your washer you follow the manufacturer's recommendations. Most washers have a water line indicated. This line shows the depth the water should be after the clothes have been put in the tub.

Let these guys start it !

There's a day coming when the enemy will be licked, beaten, whipped to a fare-thee-well—every last vestige of fight knocked out of him.

And there's a day coming when every mother's son of us will want to stand up and yell, to cheer ourselves hoarse over the greatest victory in history.

But let's not start the cheering yet.

In fact, let's not start it at all—over here. Let's leave it to the fellows who are *doing* the job—the only fellows who will *know* when it's done—to begin the celebrating.

Our leaders have told us over and over again that the smashing of the Axis will be a slow job, a

dangerous job, a bloody job.

And they've told us what our own common sense confirms: that if we at home start throwing our hats in the air and easing up before the job's completely done, it will be slower, more dangerous, bloodier.

Right now, it's still up to us to buy War Bonds—and to keep on buying War Bonds.

Let's do that. Let's keep bearing down till we get the news of final victory from the only place such news can come: the battle-line.

If we do that, we'll have the *right* to join the cheering when the time comes.

Births

Mr. and Mrs. Lawrence Thayer are the parents of a nine-pound son born in St. Theresa hospital July 18.

A daughter, Sarah Elizabeth, weighing seven pounds, 14 ounces, was born to Mr. and Mrs. Roman B. Vos in Burlington, Wis., Memorial hospital, July 17.

Mr. and Mrs. John Wallis Murrie, Salem, Wis., formerly of Antioch, are the parents of a son, William Richard, weighing 6½ pounds, born in St. Catherine's hospital, Kenosha, July 12.

OBSERVER

If you are going to travel in Illinois, you will do well to arrange for your lodgings in advance, according to the travel bureau of the Chicago Motor club. It now is rarely possible to obtain overnight accommodations in Chicago or at downstate resorts unless reservations have been made beforehand.

Calling attention to the prospect of reduced amounts of commercial canned goods available for civilian use during the war which began July 1, extension leaders of the University of Illinois, College of Agriculture, are pointing out the importance of home canning this season.

The civilian supply of canned asparagus, lima beans, snap beans, beets, corn, peas, spinach and tomatoes is expected to be about one-fifth smaller this year than last, while supplies of canned fruits will probably be slightly below last year's low level.

An increase of about one-fourth is predicted for supplies of canned soups, baked beans and baby foods.

Classification workers at Chanute field, Rantoul, Ill., got a chuckle from the names of four Kentucky communities which an interviewed soldier listed recently. He was born in Wolf Pit, attended school in Pikeville, his father was from Fish Trap and his mother from Grease Creek.

—Well, what's so funny about Grease Creek?

Worth quoting is this paragraph from one of Kathleen Norris' syndicated columns of advice to readers—

"It is a real privilege to have one of our boys home again to spoil. God knows we American women had little to do with the making of war; we would give our own lives to save these ruined younger lives if we could. But since we cannot, our share must be to make their handicapped time normal and happy. And for your consolation let me say that I have known many of these injured men to be spurred into the achievement of conspicuous success in spite of, or perhaps because of, the supposed physical handicap."

This item appeared in the Kenosha Evening News a week or so ago, but we ain't got around to doing anything about it yet.

Joseph A. Lulewicz, 20, 4810 Eighth avenue, was fined \$10 and costs today by Municipal Judge Edward J. Ruetz when he pleaded guilty to a charge of operating a car without license plates and without lights at 11:40 Wednesday evening.

The description of the vehicle in which Lulewicz and two friends were driving, as an automobile is a masterpiece of understatement, for the car is the great-granddaddy of some of the older jalopies now on the road. Pending some sort of a settlement, the "car," a 1910 Marion, was resting in the police parking lot.

The driver of the ancient auto stated when arrested that the "car" was running for its first trip since its acquisition in Antioch. Lulewicz explained that the acetylene lights on the vehicle were not in working condition.

—Now what we really wanna know is, who was the anonymous genius who sold said car to him? We gotta lotta old stuff ourselves—

Squirrel Season Will Open Here September 1

The squirrel hunting season opened in the thirty-four southernmost counties of Illinois on July 15. It will begin in the central zone of the state August 15, and in the northern zone September 1. Field men of the department of conservation predict better squirrel hunting season this year than last.

The southern zone squirrel season extends to October 15, with a daily limit of five, and possession limit of ten.

PRESS COMMENT

"We believe the war cannot now be lost... we are not so sure about winning the peace, but neither are we convinced a Democratic administration can win it more effectively... We, therefore, want Thomas E. Dewey to grasp this foreign policy issue with both hands, as on a parity with the domestic issue of sound and progressive government, and we believe it is the duty of thinking Republicans to support him in this."—San Francisco Chronicle.

"Dewey is not just smart; he displays hard sense and alertness. He is stronger a few days after than he was when, at the Convention's end, he had delivered his admirable speech accepting his nomination."—Detroit News.

In the meantime, the Dewey-Bricker team has the glamour of youthfulness about it. It has energy, resourcefulness and determination."—Charlotte, North Carolina, Observer.

Leaning Tower a Guide
Galileo, Pisan genius, used the Leaning Tower to prove for the first time that objects of different weights fall with the same speed. The swaying of the chandelier in the Cathedral, like Newton's apple, set Galileo to formulating the principle of the pendulum.

Wages Up

YESTERDAYS . . .

50 YEARS AGO
In the Antioch News

Gasoline was in great demand last week, our merchants being unable to secure a supply, owing to the strikes. Many of our people had to resort to the use of wood to cook their meals.

We understand the train on which John Rea, superintendent of the Trevor stock yards, was going to the Chicago stock yards last week was held up by the strikers and the genial John compelled, with the rest of the passengers, to help overturn freight cars and tip them across the tracks. John was not an Anarchist from choice, but from necessity.

Why use a brass thimble when you can get a silver one for 50 cents of Charles H. Barber, the jeweler, Antioch, Ill.

Steamboat tickets to and from all European seaport towns for sale at the Bank of Antioch.

Ira M. Simons sports a bran new buggy, of the Staver & Abbot make, which is a dandy.

New potatoes for sale by the bushel or by the peck. F.L. Harden, Antioch, Ill.

Ernest Lamson has been engaged by Manager Frohman to play the part of "Spettigue" in the play, "Charley's Aunt," which will make a tour of the Pacific coast. Mr. Lamson is spending the summer with his parents at Prairie View.

At the Methodist church on Sunday last, the Rev. Clarence Abel preached an eloquent sermon on "The Divine Element of our National History." The large audience listened very attentively to this discourse, and save now and then the busy hum of the ever active mosquito, which quite forcibly suggested that window screens would have been greatly appreciated by the congregation, no sound but the pastor's voice was heard.

Editorial Driftwood—
St. Louis Globe-Democrat: The current fiscal year will end with a dull thud of the largest deficit that has ever been known in a time of peace.

Chicago News—We gather from the republican newspapers of today that the harmony of the republican camp is so thick that the police have been called out to prevent the delegates from getting stuck in it.

Galesburg Mail: There is some talk that Governor McKinley has injured his Presidential prospects by his action upon the strike question in Ohio.

In the main bout for the county championship at Renehan's Round Lake arena last Friday night, Jim McMillen of Antioch finished off Lou Plummer, Waukegan, in 34 minutes and 45 seconds with a series of flying tackles.

The federal government owns a tract of 1,700 acres near Des Moines, Iowa, part of the war-time military camp. It leased this ground to a tenant who planted all but 30 percent of it in corn this spring. The tenant is now claiming a federal cash allotment for not planting the 30 percent and all indications are that he will get the money. It will take Roosevelt, himself, to smile that one off.
